  ex) 1. text ~ click → 2.

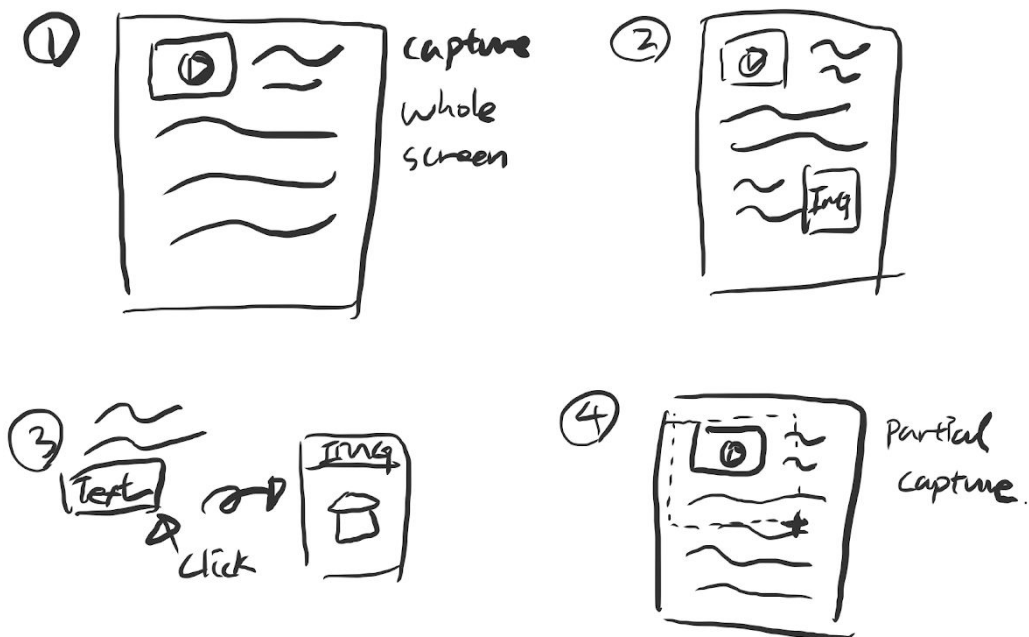

- **Task1 (Video resizing & moving)**
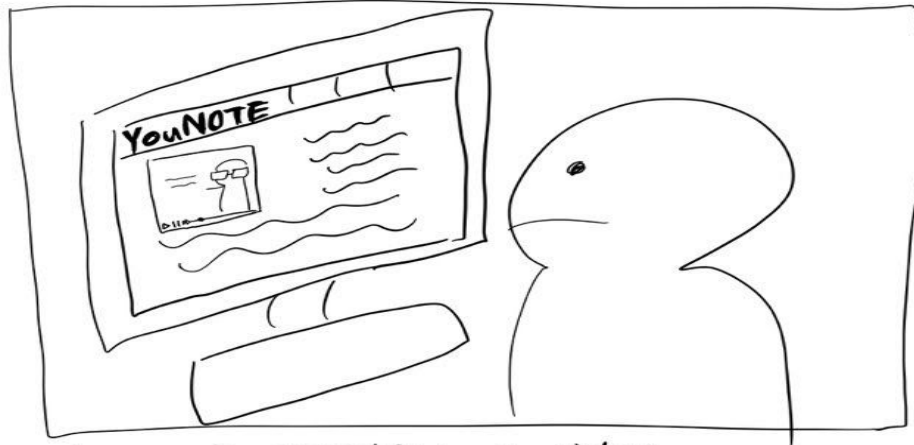

Resize & move

- **Task2 (Sticky Memo)**

- **Task3 (Video Screen Capture)**
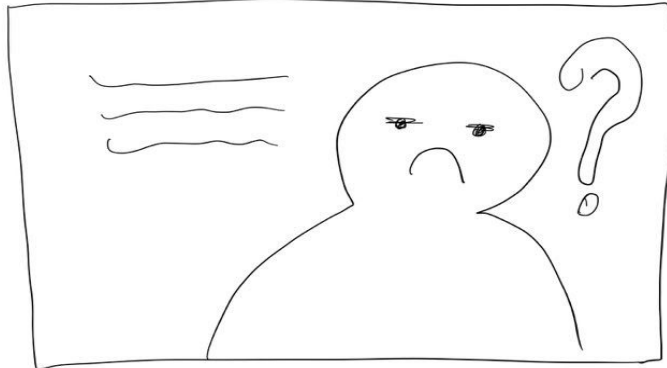

StoryBoards
- **Task1 (Video resizing & moving)**

A man is watching a video.

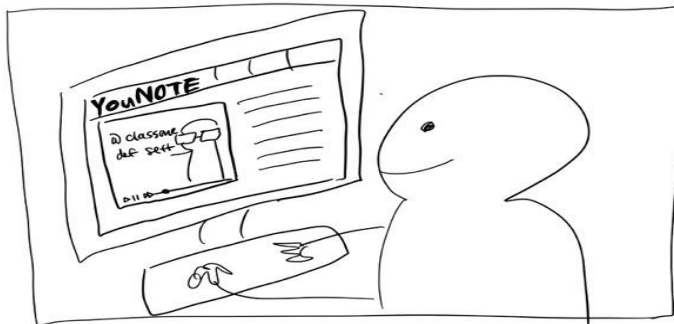

The text of the lecture is too small.

He wants to watch a big screen video.

He clicks "resize button"

He can drag button to resize a video

He can now watch a big size screen video

- **Task2 (Sticky Memo)**

o Sticky memo

1. Watching video

2. confront unknown term or additional idea

3. drag the target text with cursor

4. click "sticky memo" button

5. write memo

6. after store the sticky note, target text will have grey background color and sticky note symbol

sticky note

click it.

7 heud heap is kind of between binary search and array.

- **Task3 (Video Screen Capture)**

① Watching the video & take notes.
② Graph and other images are hard to explain in text.
③ Capture the screen using screen capture tool in the tool box.
④ Drag & place it on the note.
⑤ Attach in the text.
⑥ Capture the screen that user wants to. (like MAC).
⑦ User is satisfied.

Three secondary interface screen
